Amendments to the Abstract

Please replace pending abstract with the following replacement abstract:

ABSTRACT

-- Local radiocommunication device ~~comprising~~ including an IP access point adapted to communicate outwards from the network in IP mode, a point-to-point communication module adapted to communicate with a terminal according to at least one point-to-point communication protocol, and an interface adapted to allow the IP access point to communicate with the point-to-point communication module and thus to allow the said terminal to communicate with the outside of the local radiocommunication network. --
